About the BIAN Standard

The Banking Industry Architecture Network (BIAN) is a collaborative not-for-profit ecosystem formed of leading banks, technology providers, consultants and academics from all over the globe.

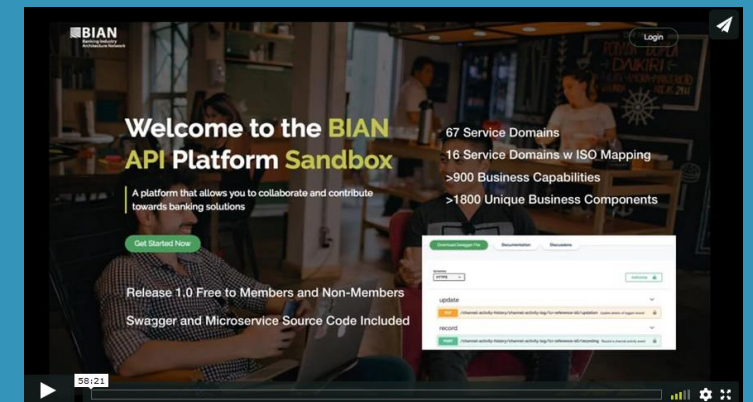

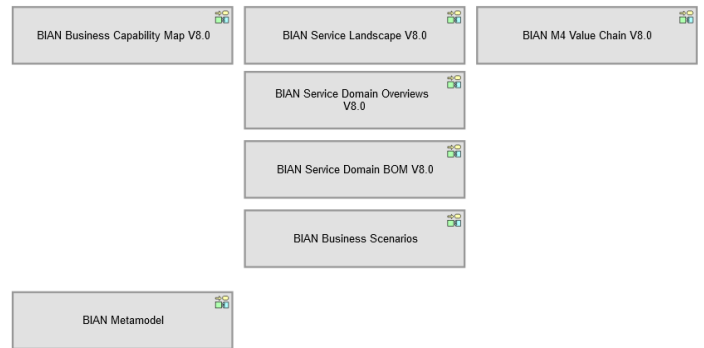

BIAN was created to establish, promote and provide a common framework for banking interoperability issues and to become a world-class reference point for interoperability and reduction of integration cost in the financial services industry.

This network of professionals is dedicated to lowering the cost of banking and boosting speed to innovation in the industry. Members combine their industry expertise to define a revolutionary banking technology framework that standardises and simplifies core banking architecture. Based on service oriented architecture principles, the comprehensive model provides a future-proofed solution for banks that fosters industry collaboration.

BIAN Banking Industry Architecture Reference Model version 8.0

BIAN Foundation Certification

Learning objectives

The certification shows that the candidate can describe and recognise:

- The purpose of BIAN and its design principles
- How BIAN can reduce integration cost and maximize interoperability
- BIAN artefacts in context including scenarios, functional patterns, action terms, behaviour qualifiers, asset types and control records.

Exam Overview

- Online delivery
- 60 questions
- 60 minutes
- Pass mark 70%
- English language
- Closed book

Included in course fee

- Exam voucher
- Practice exam
- Exam prep support
- Retake if needed

Syllabus & Weighting

Introduction to BIAN (10%)

- BIAN, the Banking Industry Architecture Network
- BIAN Service landscape, an overview

BIAN'S Primary Purpose and Approach (10%)

- Introduction to BIAN's primary purpose and approach
- Describe different approach to a well-established problem
- BIAN in the context of other standard efforts in the industry

Understanding the Theory Of BIAN (25%)

- Introduction to understanding the theory of BIAN
- Some key terms/concepts
- Business capability partitions
- The BIAN standard can be interpreted in different situations
- How to combine a static and a dynamic view in your model
- BIAN's model view on the business
- The BIAN Framework

The BIAN Service Landscape (20%)

- Introduction to the BIAN service landscape
- High-level Service Domain definition
- The BIAN Service Domains

Classroom time: 15 hours

Study Effort (ECTS): 30 hours, depending on existing knowledge.

Prerequisites: Enterprise Architecture experience or knowledge and knowledge of banking.

Level in the Bloom Taxonomy: The BIAN Foundation Certification audits candidates at the Bloom Levels 1 and 2.

How to Apply the BIAN Standard (20%)

- Introduction on how to apply the BIAN standard
- BIAN's alignment to TOGAF
- Mapping BIAN to other industry standards (e.g. IFX, ISO 20022)
- Translating at the business architecture level
- Applying BIAN Service Domains in different environments
- Using the BIAN models to define (open) APIs
- Service-based access
- Applying BIAN in different technical architectures
- Support for emerging industry approaches
- Using BIAN Service Domain partitions to define APIs
- Support for incremental adoption/migration

Building the enterprise blueprint for a bank (5%)

Enterprise blueprint as a framework for analysis (5%)

BIAN members (financial institutions)

BIAN members (partners)

CC&C is proud to be a BIAN member
and a global launch partner for BIAN
Foundation training.

Global Reach, Top-Tier Experience

CC&C is a global architecture and strategy advisory firm that offers specialist training and long-term support for self sufficiency

Our faculty members have hands-on leadership and practical experience in architecture and strategy engagements in many Fortune 500 enterprises

Our training partnerships include global brands such as Fruition Partners/**DXC**, Cognizant, HSBC , Oracle **and many others**

Global Presence

Your Partner for Global IT Talent Development

CC and C Solutions helps enterprise IT leaders succeed, in their workplaces and in their careers

People

Our value begins with our associates: passionate, experienced professionals who really care about results.

Global Reach

With offices in Australia, India, Singapore, Europe and the US, CC&C delivers virtual and in-person services everywhere.

Business Focused Expertise

Our advisors and trainers bring years of hands-on leadership experience in technology strategy, enterprise IT and enterprise architecture.

Tier-One Clients

For example: HSBC, Ford, Accenture, E&Y, AMEX, Bank of America, DXC, Oracle, Eurofins, NTT, Procter & Gamble, Costco, Axa, Westpac, Vodafone ...

Walking the Talk

We are hands-on pros, not "ivory tower" consultants: We can roll up our sleeves and deliver real architecture and strategy work.

EA Tool Gurus

We help EA teams choose and deploy tools such as SparxEA, BiZZdesign, Orbus iServer, SAG / Aris, Troux and Holocentric.
